Supplement to:
RY2009 EOHHS Technical Specifications Manual
for Appendix G Measures Reporting (2.1)

Appendix A-13:

Data Dictionary for Neonatal Antenatal Steroids Measure (NICU-1)

Neonatal Measure (NICU-1) Data Dictionary
Table of Contents

Data Element	Page #	Collected for
Payer Source (DHCFP)	33	All MassHealth Records
Postal Code	34	All MassHealth Records
Provider ID	35	All MassHealth Records
Provider Name	36	All MassHealth Records
Race (DHCFP)	37	All MassHealth Records
RID Number	39	All MassHealth Records
Ruptured Membranes and Imminent Delivery Within 6 – 12 Hours	40	NICU-1
Sample	41	All MassHealth Records
Sex	42	All MassHealth Records
Social Security Number	43	All MassHealth Records
Transfer In	44	NICU-1
Transfer Out	45	NICU-1

Data Dictionary Notes:

- Underlined text in version 2.1 indicates an update has been inserted.
- Bold italic font reflect updates in version 2.0 that did not change
- The NICU measure specifications rely on documentation from the maternal chart as opposed to the infant chart.
- Unless otherwise specified, all questions related to data abstraction for this measure pertain to the mother.

Data Element Name: *Active Maternal Infection or Choroioamnionitis*

Collected For: NICU-1

Definition: Documentation that the mother had an active maternal infection or chorioamnionitis.

Suggested Data Collection Question: Is there documentation that the mother had an active maternal infection or chorioamnionitis?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation that the mother had an active maternal infection or chorioamnionitis.
N (No)	There is no documentation that the mother had an active maternal infection or chorioamnionitis or unable to determine from medical record documentation.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Admission Date*

Collected For: All MassHealth Records

Definition: The month, day, and year of admission to acute inpatient care.

Suggested Data Collection Question: What is the date the patient was admitted to acute inpatient care?

Format:
Length: 10 – MM-DD-YYYY (includes dashes)
Type: Date
Occurs: 1

Allowable Values:
MM = Month (01-12)
DD = Day (01-31)
YYYY = Year (2000 – 9999)

Notes for Abstraction: Because this data element is critical in determining the population for many measures, the abstractor should **not** assume that the claim information for the admission date is correct. If the abstractor determines through chart review that the date is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct admission date through chart review, she/he should default to the admission date on the claim information.

A patient of a hospital is considered an inpatient upon issuance of written doctors orders to that effect.

Clarification for 04/01/2008 discharges
For patients who are admitted to Observation status and subsequently admitted to acute inpatient care, abstract the date that the determination was made to admit to acute inpatient care and the order was written. Do not abstract the date that the patient was admitted to Observation.

For patients that are admitted for surgery and/or a procedure, if the admission order states the date the orders were written and they are effective for the surgery/procedure date, then the date of the surgery/procedure would be the admission date. If the medical record reflects that the admission order was written prior to the actual date the patient was admitted and there is no reference to the date of the surgery/procedure, then the date the order was written would be the admission date.

Suggested Data Sources: Face sheet
Physician orders

Guidelines for Abstraction:

Inclusion	Exclusion
None	Admit to observation Arrival date

Data Element Name: *Admission Source*

Collected For: All MassHealth Records

Definition: The source of inpatient admission for the patient.

Suggested Data Collection Question: What was the source of inpatient admission for the patient?

Format:
Length: 1
Type: Alphanumeric
Occurs: 1

Allowable Values:

1 Non-Health Care Facility Point of Origin
The patient was admitted to this facility upon order of a physician.
Usage Note: Includes patients coming from home, a physician's office, or workplace

2 Clinic
The patient was admitted to this facility as a transfer from a freestanding or non-freestanding clinic.

3 Reserved for assignment by the NUBC
(Discontinued effective 10/1/2007.)

4 Transfer From a Hospital (Different Facility)
The patient was admitted to this facility as a hospital transfer from an acute care facility where he or she was an inpatient or outpatient.
Usage Note: Excludes transfers from Hospital Inpatient in the same facility (See Code D).

5 Transfer from a Skilled Nursing Facility (SNF) or Intermediate Care Facility (ICF)
The patient was admitted to this facility as a transfer from a SNF or ICF where he or she was a resident.

6 Transfer from another Health Care Facility
The patient was admitted to this facility as a transfer from another type of health care facility not defined elsewhere in this code list.

7 Emergency Room
The patient was admitted to this facility after receiving services in this facility's emergency room.
Usage Note: **Excludes** patients who came to the emergency room from another health care facility.

8 Court/Law Enforcement
The patient was admitted to this facility upon the direction of court of law, or upon the request of a law enforcement agency.
Usage Note: Includes transfers from incarceration facilities.

9 Information not Available
The means by which the patient was admitted to this hospital is unknown.

A Reserved for assignment by the NUBC.
(Discontinued effective 10/1/2007.)

D Transfer from One Distinct Unit of the Hospital to another Distinct Unit of the Same Hospital Resulting in a Separate Claim to the Payer
The patient was admitted to this facility as a transfer from hospital inpatient within this hospital resulting in a separate claim to the payer.
Usage Note: For purposes of this code, "Distinct Unit" is defined as a unique unit or level of care at the hospital requiring the issuance of a separate claim to the payer. Examples could include observation services, psychiatric units, rehabilitation units, a unit in a critical access hospital, or a swing bed located in an acute hospital.

E Transfer from Ambulatory Surgery Center
The patient was admitted to this facility as a transfer from an ambulatory surgery center.

F Transfer from Hospice and is Under a Hospice Plan of Care or Enrolled in a Hospice Program
The patient was admitted to this facility as a transfer from hospice.

Notes for Abstraction:

Because this data element is critical in determining the population for many measures, the abstractor should NOT assume that the claim information for the admission source is correct. If the abstractor determines through chart review that the admission source is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct admission date through chart review, she/he should default to the admission date on the claim information.

If unable to determine admission source, select "9."

Suggested Data Sources:

Emergency department record
Face sheet
History and physical
Nursing admission notes
Progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	If the patient was transferred from an emergency department of another hospital, do not use "7." This is only for patients admitted upon recommendation of **this** facility's emergency department physician/advanced practice nurse/physician assistant (physician/APN/PA).

Data Element Name: *Antenatal Steroids Administered*

Collected For: NICU-1

Definition: Documentation that the mother received antenatal steroids (corticosteroids administered IM or IV) during the pregnancy at any time prior to delivery of a very low birth weight infant.

Suggested Data Collection Question: Is there documentation that the mother received antenatal steroids (corticosteroids administered IM or IV) during the pregnancy at any time prior to delivery of a very low birth weight infant?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation that the mother received antenatal steroids (corticosteroids administered IM or IV) during the pregnancy at any time prior to delivery of a very low birth weight infant.
N (No)	There is no documentation that the mother received antenatal steroids (corticosteroids administered IM or IV) during the pregnancy at any time prior to delivery of a very low weight infant or unable to determine from medical record documentation.

Notes for Abstraction: None

Suggested Data Sources:
History and physical
Medication administration record (MAR)
Nursing flow sheets
Nursing notes
Physician notes
Prenatal record

Guidelines for Abstraction:

Inclusion	Exclusion
Refer to Appendix C, Table 6.3 in the Specifications Manual for National Hospital Quality Measures for a comprehensive list of Systemic Corticosteroids.	Inhalation Nasal sprays

Data Element Name: *Birth Weight*

Collected For: NICU-1

Definition: The infant's birth weight in grams.

Note:
453.5 grams = 1 pound
28.35 grams = 1 ounce

Suggested Data Collection Question: What was the infant's birth weight in grams?

Format:
Length: 4
Type: Alphanumeric
Occurs: 1

Allowable Values: 150 through 8165 grams

Note:
When converting from pounds and ounces to grams, do not round to the nearest pound before converting the weight to grams. Round to the nearest whole number after the conversion to grams.

Notes for Abstraction: ***If the infant's birth weight is recorded in grams, use that measurement for abstraction. Convert pounds / ounces into grams only if weight in grams is not documented in the medical record.***

If there are multiple births, abstract birth weight of the infant with the lowest birth weight.

Birth weights less than 150 grams and greater than 8165 grams need to be verified for data quality. Neonates with birth weights less than 150 grams are not likely to be born live and therefore are not part of the ICD Population.

Suggested Data Sources:
Delivery record
History and physical
Labor and delivery summary
Nursing note
Nursery record
Physician note

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Birthdate*

Collected For: All MassHealth Records

Definition: The month, day, and year the patient was born.

NOTE: Patient's age (in years) is calculated by *Admission Date* minus *Birthdate.* The algorithm to calculate age must use the month and day portion of admission date and birthdate to yield the most accurate age**.**

Suggested Data Collection Question: What is the patient's date of birth?

Format:
Length: 10 – MM-DD-YYYY (includes dashes)
Type: Date
Occurs: 1

Allowable Values:
MM = Month (01-12)
DD = Day (01-31)
YYYY = Year (1880 – 9999)

Notes for Abstraction: Because this data element is critical in determining the population for many measures, the abstractor should **not** assume that the claim information for the birthdate is correct. If the abstractor determines through chart review that the date is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct birthdate through chart review, she/he should default to the date of birth on the claim information.

Suggested Data Sources:
Emergency department record
Face sheet
Registration form

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Case Identifier*

Collected For: All MassHealth Records

Definition: A measurement system-generated number that uniquely identifies an episode of care. This identification number should be used by the performance measurement system in order to allow the health care organization to link this Case Identifier to a specific episode of care.

Suggested Data Collection Question: What is the unique measurement system-generated number that identifies this episode of care?

Format:
Length: 9
Type: Numeric
Occurs: 1

Allowable Values: Values greater than zero (0) assigned by the system.

Notes for Abstraction: None

Suggested Data Sources: Unique measurement system generated number

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Clinical Trial*

Collected For: All MassHealth Records

Definition: Documentation that the patient was involved in a clinical trial during this hospital stay, relevant to the measure set for this admission. Clinical trials are organized studies to provide large bodies of clinical data for strategically valid evaluation or treatment. These studies are usually rigorously controlled tests of new drugs, invasive medical devices, or therapies on human subjects.

Suggested Data Collection Question: Is the patient participating in a clinical trial?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation that the patient was involved in a clinical trial during this hospital stay relevant to the measure set for this admission.
N (No)	There is no documentation that the patient was involved in a clinical trial during this hospital stay relevant to the measure set for this admission or unable to determine from medical record documentation.

Notes for Abstraction: This data element is used to exclude patients that are involved in a clinical trial during this hospital stay relevant to the measure set for this admission. Consider the patient involved in a clinical trail if documentation indicates:

- The patient was evaluated for enrollment in a clinical trial after hospital arrival, but was not accepted or refused participation.
- The patient was newly enrolled in a clinical trial during the hospital stay.
- The patient was enrolled in a clinical trial prior to arrival and continued active participation in that clinical trial during the hospital stay.
- To answer "Yes" to this data element, there must be formal documentation (trial protocol or patient consent form) in the medical record that the patient was involved in a clinical trial designed to enroll patients with the condition specified in the applicable measure set.
- If it is not clear which study that the clinical trial is enrolling, select "No". Assumptions should not be made if it is not specified.

Suggested Data Sources: **ONLY ACCEPTABLE SOURCES:**

- Clinical trial protocol
- Consent forms for clinical trial

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Contraindication to Antenatal Steroids*

Collected For: NICU-1

Definition: Documentation of one or more contraindications to administering antenatal steroids to the mother. Corticosteroids are a family of potent anti-inflammatory medications produced either naturally by the adrenal cortex or manufactured synthetically, in inhaled, topical, oral, and intravenous forms.

Suggested Data Collection Question: Is there documentation of one or more contraindications to administering antenatal steroids to the mother?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation of one or more contraindications to administering antenatal steroids to the mother.
N (No)	There is no documentation of contraindications to administering antenatal steroids to the mother or unable to determine from medical record documentation.

Notes for Abstraction: When there is documentation of an "allergy", "sensitivity", "intolerance", "adverse or side effects", regard this as documentation of contraindication regardless of what type of reaction might be noted.

Do not attempt to distinguish between true allergies, sensitivities, intolerances, adverse or side effects, etc. (e.g., "Allergies: Prednisolone – select "Yes.")

Suggested Data Sources:
Consultation notes
Discharge summary
Emergency department record
History and physical
Medication administration record (MAR)
Nursing notes
Physician notes
Physician orders

Guidelines for Abstraction:

Inclusion	Exclusion
Allergies/sensitivities/intolerance Side effects Refer to Appendix C, Table 6.3 in the Specifications Manual for National Hospital Quality Measures for a comprehensive list of Systemic Corticosteroids.	None

Data Element Name: *Discharge Date*

Collected For: All MassHealth Records

Definition: The month, day, and year the patient was discharged from acute care, left against medical advice (AMA), or expired during this stay.

Suggested Data Collection Question: What is the date the patient was discharged from acute care, left against medical advice (AMA), or expired during this stay?

Format:

Length:	10 – MM-DD-YYYY (includes dashes)
Type:	Date
Occurs:	1

Allowable Values:

MM =	Month (01-12)
DD =	Day (01-31)
YYYY =	Year (2000 – 9999)

Notes for Abstraction: Because this data element is critical in determining the population for many measures, the abstractor should **not** assume that the claim information for the discharge date is correct. If the abstractor determines through chart review that the date is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct discharge date through chart review, she/he should default to the discharge date on the claim information.

Suggested Data Sources:
Discharge summary
Face sheet
Nursing discharge notes
Physician orders
Progress notes
Transfer note

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Discharge Status*

Collected For: All MassHealth Records

Definition: The place or setting to which the patient was discharged.

Suggested Data Collection Question: What was the patient's discharge disposition?

Format:
Length: 2
Type: Alphanumeric
Occurs: 1

Allowable Values:

01 Discharge to home care or self care (routine discharge)
Usage Note: Includes discharge to home; jail or law enforcement; home on oxygen if DMS only; any other DMS only; group home, foster care, and other residential care arrangements; outpatient programs, such as partial hospitalization or outpatient chemical dependency programs; assisted living facilities that are not state-designated.

02 Discharged / transferred to a short to a short term general hospital for inpatient care

03 Discharged / transferred to a skilled nursing facility (SNF) with Medicare certification in anticipation of covered skilled care
Usage Note: Medicare indicates that the patient is discharged / transferred to a Medicare certified nursing facility. For hospitals with an approved swing bed arrangement, use Code 61 – Swing Bed. For reporting other discharges / transfers to nursing facilities, see 04 and 64.

04 Discharged / transferred to an intermediate care facility (ICF)
Usage Note: Typically defined at the state level for specifically designated intermediate care facilities. Also used to designate patients that are discharged / transferred to a nursing facility with neither Medicare nor Medicaid certification and for discharges / transfers to state designated Assisted Living facilities.

05 ***For discharges 01/01/2008 through 09/30/2008***
Discharged / transferred to another type of health acre institution not defined elsewhere in this code list
Usage Note: Cancer hospitals excluded from Medicare PPS and children's hospitals are examples of such other types of health care institutions.

05 Effective with 10/01/2008 discharges
Discharged/transferred to a designated cancer center or children's hospital
Usage Note: Transfers to non-designated cancer hospitals should use Code 02. A list of (National Cancer Institute) Designated Cancer Centers can be found at http://www3.cancer.gov/cancercenters/centerslist.html

Allowable Values continued:

06 Discharge / transferred to home under care of organized home health service organization in anticipation of covered skilled care
Usage Note: Report this code when the patient is discharged / transferred to home with a written plan of care (tailored to the patient's medical needs) for home care services.

07 Left against medical advice or discontinued care

20 Expired

41 ***For discharges 01/01/2008 through 09/30/2008***
Expired in a medical facility (e.g., hospital, SNF, ICF or freestanding hospice)
Usage Note: For use only on Medicare and CHAMPUS (TRICARE) claims for hospice care.

43 Discharged/transferred to a federal health care facility
Usage Note: Discharges and transfers to a government Operated health care facility such as a Department of Defense hospital, a Veteran's Administration hospital or a Veteran's Administration nursing facility. To be used whenever the destination at discharge is a federal health care facility, whether the patient resides there or not.

50 Hospice – home

51 Hospice - medical facility (certified) providing hospice level of care

61 Discharged/transferred to hospital-based Medicare approved swing bed
Usage Note: Medicare-used for reporting patients discharged/transferred to a SNF level of care within a hospital's approved swing bed arrangement.

62 Discharged/transferred to an inpatient rehabilitation facility (IRF) including rehabilitation distinct part units of a hospital

63 Discharged/transferred to a Medicare certified long term care hospital (LTCH)
Usage Note: For hospitals that meet the Medicare criteria forLTCH certification.

64 Discharged/transferred to a nursing facility certified under Medicaid but not certified under Medicare

65 Discharged/transferred to a psychiatric hospital or psychiatric distinct part unit of a hospital

66 Discharged/transferred to a Critical Access Hospital (CAH)

70 Effective with 10/01/2008 discharges
Discharged/transferred to another type of health care institution not defined elsewhere in this code list (See Code 05)

Notes for Abstraction: The values for *Discharge Status* are taken from the National Uniform Billing Committee (NUBC) manual which is used by billing/HIM to complete the UB-04.

Because this data element is critical in determining the population for many measures, the abstractor should **not** assume that the claim information for discharge status is correct. If the abstractor determines through chart review that the discharge status is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct discharge status through chart review, she/he should default to the discharge status on the claim information.

Suggested Data Sources:
Discharge instruction sheet
Discharge summary
Face sheet
Nursing discharge notes
Physician orders
Progress notes
Social service notes
Transfer record

Guidelines for Abstraction:

Inclusion	Exclusion
Refer to Appendix H, Table 2.5 in the Specifications Manual for National Hospital Quality Measures.	None

Data Element Name: ***Episode of Care***

Collected For: All MassHealth Records

Definition: The code for the measure set submitted.

Suggested Data Collection Question: What is the measure set for which data is being submitted?

Format:

Length:	22
Type:	Alphanumeric
Occurs:	1

Allowable Values:

CAC-1a	Inpatient Use of Relievers
CAC-2a	Inpatient Use of Corticosteroids
MAT-1	Intrapartum Antibiotic Prophlyaxis for GBS
MAT-2	Perioperative Antibiotics for Cesarean Section
NICU-1	Administration of Antenatal Steroids
PN	Community Acquired Pneumonia
SCIP	Surgical Care Infection Prevention

Notes for Abstraction: None.

Suggested Data Sources: Not Applicable

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Ethnicity (DHCFP)*

Collected For: All MassHealth Records

Definition: Documentation of the patient's ***self-reported*** ethnicity as defined by Massachusetts DHCFP regulations.

Suggested Data Collection Question: ***What is the patient's self-reported ethnicity?***

Format:
Length: 6
Type: Alphanumeric
Occurs: 1

Allowable Values: Select one:

Code	Allowable Value	Code	Allowable Value
2060-2	African	**2071-9**	Haitian
2058-6	African American	**2158-4**	Honduran
AMERCN	American	**2039-6**	Japanese
2028-9	Asian	**2040-4**	Korean
2029-7	Asian Indian	**2041-2**	Laotian
BRAZIL	Brazilian	**2148-5**	Mexican, Mexican American, Chicano
2033-9	Cambodian	**2118-8**	Middle Eastern
CVERDN	Cape Verdean	**PORTUG**	Portuguese
CARIBI	Caribbean Island	**2180-8**	Puerto Rican
2034-7	Chinese	**RUSSIA**	Russian
2169-1	Columbian	**2161-8**	Salvadoran
2182-4	Cuban	**2047-9**	Vietnamese
2184-0	Dominican	**2155-0**	Central American (not specified)
EASTEU	Eastern European	**2165-9**	South American (not specified)
2108-9	European	**OTHER**	Other Ethnicity
2036-2	Filipino	**UNKNOW**	Unknown/not specified
2157-6	Guatemalan		

The Massachusetts DHCFP codes and allowable values for ethnicity listed above differ significantly from ones required for National Hospital Quality Measures reporting. Hospitals must use the DHCFP ethnicity codes and allowable valuables when preparing all MassHealth data files for submission.

Notes for Abstraction: ***Only collect ethnicity data that is self-reported by the patient. Do not abstract a clinician's assessment documented in the medical record.***

If numeric code is used, include the hyphen after the fourth number.

If the medical record contains conflicting documentation on patient self-reported ethnicity, abstract the most recent dated documentation.

If codes and allowable values, other than those listed above, are documented in the medical record, a crosswalk that links the hospitals' codes/values to the DHCFP requirements must be provided for chart validation.

Suggested Data Sources: ***Administrative record***
Face sheet (Emergency Department / Inpatient)
Nursing admission assessment
Prenatal initial assessment form

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Fetal Demise*

Collected For: NICU-1

Definition: Documentation of fetal demise.

Suggested Data Collection Question: Is there documentation of fetal demise in the medical record?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation of fetal demise in the medical record.
N (No)	There is no documentation of fetal demise in the medical record or unable to determine from medical record documentation.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *First Name*

Collected For: All MassHealth Records

Definition: The patient's first name.

Suggested Data Collection Question: What is the patient's first name?

Format:
Length: 30
Type: Alphanumeric
Occurs: 1

Allowable Values: Enter the patient's first name.

Notes for Abstraction: None

Suggested Data Sources: Emergency department record
Face sheet
History and physical

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Gestational Age*

Collected For: NICU-1

Definition: The gestational age of the infant in weeks and days at the time of delivery.

Suggested Data Collection Question: What gestational age is documented for the infant at the time of delivery?

Format:
Length: 2
Type: Weeks (Numeric)
Occurs: 1

Allowable Values: (24-33)

Format:
Length: 1
Type: Days (Numeric)
Occurs: 1

Allowable Values: (0-6)

Notes for Abstraction: This question refers to the gestational age prior to the time of delivery.

Suggested Data Sources:
History and physical
Nursing admission assessment
Prenatal record
Progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Hispanic **Indicator** (DHCFP)*

Collected For: All MassHealth Records

Definition: Documentation that the patient self-reported as Hispanic, Latino, or Spanish.

Suggested Data Collection Question: ***Is there documentation that the patient self-reported as Hispanic, Latino, or Spanish?***

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	Patient self-reported as Hispanic / Latino / Spanish.
N (No)	Patient did not self-report as Hispanic / Latino / Spanish or unable to determine from medical record documentation.

Notes for Abstraction: ***Only collect data that is self-reported by the patient. Do not abstract a clinician's assessment documented in the medical record.***

If the medical record contains conflicting documentation on patient self-reported Hispanic Indicator, abstract the most recent dated documentation.

Suggested Data Sources: ***Administrative records***
Face sheet (Emergency Department / Inpatient)
Nursing admission assessment
Prenatal initial assessment form

Guidelines for Abstraction:

Inclusion	Exclusion
The term "Hispanic" or "Latino" can be used in addition to "Spanish origin" to include a person of Cuban, Puerto Rican, Mexican, Central or South American, or other Spanish culture or origin regardless of race.	None

Data Element Name: *Hospital Bill Number*

Collected For: All MassHealth Records

Definition: The unique number assigned to each patient's bill that distinguishes the patient and their bill from all others in that institution as defined by Massachusetts DHCFP.

Suggested Data Collection Question: What is the patient's hospital bill number?

Format:
Length: 20
Type: Alphanumeric
Occurs: 1

Allowable Values: Values greater than zero (0) assigned by the hospital.

Notes for Abstraction: None

Suggested Data Sources: Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Hospital Patient ID Number*

Collected For: All MassHealth Records

Definition: ***The identification number used by the Hospital to identify this patient.***

Suggested Data Collection Question: What is the patient's hospital patient identification number?

Format:
Length: 40
Type: Alphanumeric
Occurs: 1

Allowable Values: Up to 40 letters and / or numbers

Notes for Abstraction: ***When abstracting this data element for a crosswalk file, the data in this field must match the hospital patient ID number submitted in the corresponding clinical measure file.***

Suggested Data Sources: ***Administrative record***
Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Last Name*

Collected For: All MassHealth Records

Definition: The patient's last name.

Suggested Data Collection Question: What is the patient's last name?

Format:
Length: 60
Type: Alphanumeric
Occurs: 1

Allowable Values: Enter the patient's last name.

Notes for Abstraction: None

Suggested Data Sources: Emergency department record
Face sheet
History and physical

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Maternal Cardiomyopathy*

Collected For: NICU-1

Definition: Documentation that the mother has cardiomyopathy.

Suggested Data Collection Question: Is there documentation that the mother has cardiomyopathy?

Format:
Length: 1
Type: Alpha
Occurs: 1

Allowable Values:

Y (Yes)	There is documentation that the mother has cardiomyopathy.
N (No)	There is no documentation that the mother has cardiomyopathy or unable to determine from medical record documentation.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Maternal Thyrotoxicosis*

Collected For: NICU-1

Definition: Documentation that the mother had thyrotoxicosis.

Suggested Data Collection Question: Is there documentation that the mother had thyrotoxicosis?

Format:
Length: 1
Type: Alpha
Occurs: 1

Allowable Values:

Y (Yes)	There is documentation that the mother had thyrotoxicosis.
N (No)	There is no documentation that the mother had thyrotoxicosis or unable to determine from medical record documentation.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Mother With Tuberculosis*

Collected For: NICU-1

Definition: Documentation that the mother had tuberculosis.

Suggested Data Collection Question: Is there documentation that the mother had tuberculosis?

Format:
Length: 1
Type: Alpha
Occurs: 1

Allowable Values:

Y (Yes)	There is documentation that the mother had tuberculosis.
N (No)	There is no documentation that the mother had tuberculosis or unable to determine from medical record documentation.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Mother's Age Less Than 18 Years*

Collected For: NICU-1

Definition: Documentation that the mother's age is less than 18 years old ***at the time of admission***.

Suggested Data Collection Question: Is there documentation that the mother's age was less than 18 years old at the time of admission?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation that the mother's age was less than 18 years at the time of admission.
N (No)	There is no documentation that the mother's age was less than 18 years at the time of admission or unable to determine from medical record documentation.

Notes for Abstraction: The patient's age (in years) can be calculated by *Admission Date* minus *Birthdate*.

Suggested Data Sources: Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Neonatal Principal Diagnosis Code*

Collected For: NICU-1

Definition: The International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code associated with a birth weight of less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks and 6 days (inclusive) identified as the principal diagnosis code ***and assigned to the baby's medical record.***

Suggested Data Collection Question: ***What is the principal diagnosis code assigned to the baby's record associated with a birth weight of less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks and 6 days (inclusive)?***

Format:
Length: 6 (implied decimal point)
Type: Alphanumeric
Occurs: 1

Allowable Values: Any valid ICD-9-CM diagnosis code from the inclusion list below.

Notes for Abstraction: None

Suggested Data Sources: ***Administrative record***
Discharge summary
Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
ICD-9-CM Diagnosis Codes: 764.02 – 764.05 765.02 – 765.05 764.12 – 764.15 765.12 – 765.15 764.22 – 764.25 765.22 – 765.2***6*** 764.92 – 764.95	None

Data Element Name: *Neonatal Secondary Diagnosis Code*

Collected For: NICU-1

Definition: The International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code associated with a birth weight of less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks and 6 days (inclusive) identified as a secondary diagnosis code ***and assigned to the baby's medical record***.

Suggested Data Collection Question: ***What is the secondary diagnosis code assigned to the baby's record associated with a birth weight of less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks and 6 days (inclusive)?***

Format:
Length: 6 (implied decimal point)
Type: Alphanumeric
Occurs: 1

Allowable Values: Any valid ICD-9-CM diagnosis code from the inclusion list below.

Notes for Abstraction: None

Suggested Data Sources: ***Administrative record***
Discharge summary
Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
ICD-9-CM Diagnosis Codes: 764.02 – 764.05 765.02 – 765.05 764.12 – 764.15 765.12 – 765.15 764.22 – 764.25 765.22 – 765.2***6*** 764.92 – 764.95	None

Data Element Name: *NICU Measure Eligibility*

Collected For: NICU-1

Definition: Documentation that the ***mother's medical record*** is eligible for the NICU-1 measure. Eligibility requires an ICD-9-CM principal or secondary diagnosis code associated with a birth weight of less than 1500 grams or a gestational age at birth between 24 weeks 0 days and 33 weeks 6 days (inclusive) ***be assigned to the baby's medical record***.

Suggested Data Collection Question: ***Is the principal or a secondary ICD-9-CM diagnosis code associated with a birth weight less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks 6 days assigned to the baby's medical record for this mother?***

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is an ICD-9-CM principal or secondary discharge diagnosis code associated with a birth weight of less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks 6 days in the baby's medical record for this mother.
N (No)	There is no ICD-9-CM principal or secondary discharge diagnosis code associated with either a birth weight of less than 1500 grams or a gestational age between 24 weeks 0 days and 33 weeks 6 days in the baby's medical record for this mother or unable to determine from medical record documentation.

Notes for Abstraction: None

Suggested Data Sources: Administrative record
Discharge summary
Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
ICD-9-CM Diagnosis Codes: 764.02 – 764.05 765.02 – 765.05 764.12 – 764.15 765.12 – 765.15 764.22 – 764.25 765.22 – 765.2***6*** 764.92 – 764.95	None

Data Element Name: *Other Reasons for Contraindication to Antenatal Steroids*

Collected For: NICU-1

Definition: Documentation by a physician, nurse practitioner, or physician assistant of a reason for not administering antenatal steroids other than active maternal infection or chorioamnionitis, fetal demise, maternal cardiomyopathy, maternal thyrotoxicosis, mother with tuberculosis, or ruptured membranes and imminent delivery within 6– 12 hours.

Suggested Data Collection Question: Is there documentation by a physician, nurse practitioner, or physician assistant of a reason for not administering antenatal steroids other than active maternal infection or chorioamnionitis, fetal demise, maternal cardiomyopathy, maternal thyrotoxicosis, mother with tuberculosis, or ruptured membranes and imminent delivery within 6– 12 hours?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation by a physician, nurse practitioner, or physician assistant of a reason for not administering antenatal steroids other than active maternal infection or chorioamnionitis, fetal demise, maternal cardiomyopathy, maternal thyrotoxicosis, mother with tuberculosis, or ruptured membranes and imminent delivery within 6– 12 hours.
N (No)	There is no documentation by a physician, nurse practitioner, or physician assistant of a reason for not administering antenatal steroids other than active maternal infection or chorioamnionitis, fetal demise, maternal cardiomyopathy, maternal thyrotoxicosis, mother with tuberculosis, or ruptured membranes and imminent delivery within 6– 12 hours.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Payer Source (DHCFP)*

Collected For: All MassHealth Records

Definition: Source of payment for services provided to the patient as defined by the Massachusetts DHCFP regulations.

Suggested Data Collection Question: What is the DHCFP assigned Payer Source code?

Format:
Length: 3
Type: Alphanumeric
Occurs: 1

Allowable Values:
103 Medicaid – includes MassHealth
104 Medicaid Managed Care - Primary Care Clinician (PCC) Plan

Notes for Abstraction:

The MassHealth population covered by the Acute Hospital RFA are those members where Medicaid is the primary payer, or when no other insurance is present.

Members enrolled in any of the four MassHealth managed care plans are excluded.

The Massachusetts Medicaid payer code definitions used by the Division of Healthcare Finance and Policy (DHCFP) differ slightly from the national hospital quality reporting. Hospitals must use the DHCFP Medicaid payer source codes when preparing the MassHealth payer data files for submission.

Suggested Data Sources: Face sheet (Emergency Department / Inpatient)

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Postal Code*

Collected For: All MassHealth Records

Definition: The postal code of the patient's residence. For the United States zip codes the hyphen is implied. If the patient is determined to not have a permanent residence, then the patient is considered homeless.

Suggested Data Collection Question: What is the postal code of the patient's residence?

Format:
Length: 9
Type: Alphanumeric
Occurs: 1

Allowable Values: Any valid five or nine digit postal code or "HOMELESS" if the patient is determined not to have a permanent residence. If the patient is not a resident of the United States, use "Non-US."

Notes for Abstraction: If the postal code of the patient is unable to be determined from medical record documentation, enter the provider's postal code.

Suggested Data Sources: Face sheet
Social service notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Provider ID*

Collected For: All MassHealth Records

Definition: ***The provider's seven digit acute care Medicaid or six digit Medicare provider identifier.***

Suggested Data Collection Question: ***What is the provider's seven digit acute care Medicaid or six digit Medicare provider identifier?***

Format:
Length: ***7***
Type: Alphanumeric
Occurs: 1

Allowable Values: ***Any valid seven digit Medicaid or six digit Medicare provider ID.***

Notes for Abstraction: ***When abstracting this data element for a crosswalk file, the data in this field must match the provide ID number submitted in the corresponding clinical measure file.***

Suggested Data Sources: ***Administrative record***

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Provider Name*

Collected For: All MassHealth Records

Definition: The name of the provider of acute care inpatient services.

Suggested Data Collection Question: What is the name of the provider of acute care inpatient services?

Format:
Length: 60
Type: Alphanumeric
Occurs: 1

Allowable Values: Provider name.

Notes for Abstraction: The provider name is the name of the hospital.

Suggested Data Sources: Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Race (DHCFP)*

Collected For: All MassHealth Records

Definition: Documentation of the patient's ***self-reported*** race as defined by the Massachusetts DHCFP regulations.

Suggested Data Collection Question: ***What is the patient's self-reported race?***

Format:
Length: 6
Type: Alphanumeric
Occurs: 1

Allowable Values: Select one:

Code	Allowable Values
R1	American Indian or Alaska Native:
R2	Asian:
R3	Black / African American:
R4	Native Hawaiian or other Pacific Islander:
R5	White.
R9	Other Race:
UNKNOW	Unknown / not specified:

The Massachusetts DHCFP codes and allowable values for race listed above differ significantly from ones required for National Hospital Quality Measures reporting. Hospitals must use the DHCFP race codes and allowable valuables when preparing all MassHealth data files for submission.

Notes for Abstraction: ***Only collect race data that is self-reported by the patient. Do not abstract a clinician's assessment documented in the medical record.***

If the medical record contains conflicting documentation on patient self-reported race, abstract the most recent dated documentation.

If codes and allowable values, other than those listed above, are documented in the medical record, a crosswalk that links the hospitals' codes/values to the DHCFP requirements must be provided for chart validation.

Suggested Data Sources: ***Administrative records***
Face sheet (Emergency Department / Inpatient)
Nursing admission assessment
Prenatal initial assessment form

Guidelines for Abstraction:

Inclusion	Exclusion
• **American Indian or Alaska Native:** A person having origins in any of the original peoples of North and South America (including Central America), and who maintain tribal affiliations or community attachment, e.g. any recognized tribal entity in North and South America (including Central America), Native American. • **Asian:** A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. • **Black / African American:** A person having origins in any of the black racial groups of Africa. Terms such as "Haitian" or "Negro", can be used in addition to "Black or African American". • **Native Hawaiian or Other Pacific Islander:** A person having origins in any of the other original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. • **White:** A person having origins in any of the original peoples of Europe, the Middle East, or North Africa, e.g., Caucasian, Iranian, White. • **Other Race:** A person having an origin other than what has been listed above. • **Unknown:** Unable to determine the patient's race or not stated (e.g., not documented, conflicting documentation or patient unwilling to provide).	None

Data Element Name: *RID Number*

Collected For: All MassHealth Records

Definition: The patient's MassHealth recipient identification number.

Suggested Data Collection Question: What is the patient's MassHealth recipient identification number?

Format:
Length: 10
Type: Alphanumeric
Occurs: 1

Allowable Values:
Any valid recipient identification (RID) number
Alpha characters must be upper case
No embedded dashes or spaces or special characters

Notes for Abstraction: The abstractor should **not** assume that the claim information for the patient's RID number is correct. If the abstractor determines through chart review that the RID number is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct RID number through chart review, she/he should default to the RID number on the claim information.

Suggested Data Sources:
Emergency department record
Face sheet

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Ruptured Membranes and Imminent Delivery Within 6 – 12 Hours*

Collected For: NICU-1

Definition: Documentation that the mother had ruptured membranes and delivery was imminent within 6 – 12 hours.

Suggested Data Collection Question: Is there documentation that the mother had ruptured membranes and delivery was imminent within 6 – 12 hours?

Format:
Length: 1
Type: Alpha
Occurs: 1

Allowable Values:

Y (Yes)	There is documentation that the mother had ruptured membranes and delivery was imminent within 6 – 12 hours.
N (No)	There is no documentation that the mother had ruptured membranes and delivery was imminent within 6 – 12 hours or unable to determine from medical record documentation.

Notes for Abstraction: This question refers to contraindications to antenatal steroids and should only be answered if the question "Was there documentation of one or more contraindications to administering antenatal steroids to the mother?" was answered "Yes".

Suggested Data Sources:
Consultation notes
History and physical
Nursing admission assessment
Nursing notes
Physician progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Sample*

Collected For: All MassHealth Records

Definition: Indicates if the data being transmitted for a hospital has been sampled, or represent an entire population for the specified time period.

Suggested Data Collection Question: Does this case represent part of a sample?

Format:
Length: 1
Type: Alpha
Occurs: 1

Allowable Values:

Y (Yes)	The data represents part of a sample.
N (No)	The data is not part of a sample; this indicates the hospital is abstracting 100 percent of the discharges eligible for this topic.

Notes for Abstraction: None

Suggested Data Sources: Not Applicable

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Sex*

Collected For: All MassHealth Records

Definition: The patient's documented sex on arrival at the hospital.

Suggested Data Collection Question: What was the patient's sex on arrival?

Format:
Length: 1
Type: Alpha
Occurs: 1

Allowable Values:
M = Male
F = Female
U = Unknown

Notes for Abstraction: ***Consider the sex to be unable to determine and select "Unknown" if:***

- ***The patient refuses to provide their sex***
- ***Documentation is contradictory***
- ***Documentation indicates the patient is a transsexual***
- ***Documentation indicates the patient is a hermaphrodite***

Suggested Data Sources:
Consultation notes
Emergency department record
Face sheet
History and physical
Nursing admission notes
Progress notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Social Security Number*

Collected For: All MassHealth Records

Definition: The social security number (SSN) assigned to the patient.

Suggested Data Collection Question: What is the patient's social security number?

Format:
Length: 9 (no dashes)
Type: Alphanumeric
Occurs: 1

Allowable Values:
Any valid social security number
Alpha characters must be upper case
No embedded dashes or spaces or special characters

Notes for Abstraction: The abstractor should **not** assume that the claim information for the social security number is correct. If the abstractor determines through chart review that the social security number is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct social security number through chart review, she/he should default to the social security number on the claim information.

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Transfer In*

Collected For: NICU-1

Definition: Documentation that the mother was transferred in from another acute care facility.

Suggested Data Collection Question: Is there documentation that the mother was a transferred in from another hospital ***prior to delivery***?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation that the mother was a transfer from another hospital ***prior to delivery***.
N (No)	There is no documentation that the mother was a transfer from another hospital ***prior to delivery*** or unable to determine from medical record documentation.

Notes for Abstraction: None

Suggested Data Sources: ***Administrative record***
Discharge summary
Face sheet
History and physical
Nursing notes

Guidelines for Abstraction:

Inclusion	Exclusion
None	None

Data Element Name: *Transfer Out*

Collected For: NICU-1

Definition: Documentation that the mother was transferred to another acute care facility.

Suggested Data Collection Question: Is there documentation that the mother transferred to another acute care facility ***prior to delivery***?

Format:

Length:	1
Type:	Alpha
Occurs:	1

Allowable Values:

Y (Yes)	There is documentation that the mother transferred to another acute care facility ***prior to delivery***.
N (No)	There is no documentation that the mother transferred to another acute care facility ***prior to delivery*** or unable to determine from medical record documentation.
